One of many features of the PowerShell command line tool is its ability to connect with and manage the Exchange Server remotely. The procedure described below applies to the classic on-prem Exchange server and to the Office 365/Exchange Online version.

How to start remote PowerShell session to Exchange or

Sigkill, I can do this directly on Windows Sever 2012 R2, however I think I can kill open files with : Administrative Tools > Computer Management > Shared Folders > Open Files (as stated above) but that is not a valid option, since I cannot do this 24/7, and I don't want to give users the admin pass.

[SOLVED] Cannot delete .PDF files from a shared folder

PowerShell is exciting and has really taken off as the replacement for Vbscript. I hope to blog more about the awesome features of PowerShell in the future, but I will start off with a simple bypass of Execution Policies so that you can use your scripts.
