As of August 29, 2014, Google has decided to intentionally break old browsers. They say it's not a bug, it's by design here, even though Google's support page says it accepts Safari 4 as a fully supported browser. If you want Google searches to go back to the modern style, you need to change your User-Agent string.

Mac OS X Hints - A community-built collection of OS X hints

Mac OS 8 is an operating system that was released by Apple Computer, Inc. on July 26, 1997. It represents the largest overhaul of the classic Mac OS since the release of System 7, approximately six years before. It emphasizes color more than prior versions. Released over a series of updates, Mac OS 8 represents an incremental integration of many of the technologies which had been developed from ...

Note: This page has reader reports on PCI Ethernet Network cards with OS X (and rare comments on OS 9.x). Some cards/chipsets are natively compatible, others note links to 3rd party drivers, some also OS 9.x compatible. If you find Mac compatible drivers for a PCI Ethernet card, or cards that work with the builtin drivers, let me know the card/system details.
