DoDAAD Tables, Codes, and Rules - dla.mil

Logic (from the Ancient Greek: ??????, translit. logik?) is the systematic study of the form of valid inference, and the most general laws of truth. A valid inference is one where there is a specific relation of logical support between the assumptions of the inference and its conclusion. In ordinary discourse, inferences may be signified by words such as therefore, hence, ergo, and so on.

Logic - Wikipedia

Logistics is generally the detailed organization and implementation of a complex operation. In a general business sense, logistics is the management of the flow of things between the point of origin and the point of consumption in order to meet requirements of customers or corporations. The resources managed in logistics can include physical items such as food, materials, animals, equipment ...

Introduction What is Prescriptive Analytics? “Prescriptive analytics is the application of logic and mathematics to data to specify a preferred course of action. While all types of analytics ultimately support better decision making, prescriptive analytics outputs a decision rather than a report, statistic, probability or estimate of future outcomes.”

It's long been best practice to ensure that the PDF documents you file electronically with the court are text searchable. That's because one can navigate searchable documents by looking up specific words and phrases, add markup (like comments) to specific sections, and copy and paste individual blocks of text.

How to make a PDF text searchable | One Legal
