Allium cepa (onion) bulbs are used as spice in the preparation of virtually all meals in Nigeria, and some researchers had reported its medicinal values. This study was designed to estimate the anti-nutrients and mineral composition of this spice.

Anti-nutrients composition and mineral analysis of allium

Calcium is one component of the most common type of human kidney stones, calcium oxalate. Some studies [which?] suggest that people who take calcium or vitamin D as a dietary supplement have a higher risk of developing kidney stones. In the United States, kidney stone formation was used as an indicator of excess calcium intake by the Reference Daily Intake committee for calcium in adults.

Kidney stone disease - Wikipedia

Aspirin, also known as acetylsalicylic acid (ASA), is a medication used to treat pain, fever, or inflammation. Specific inflammatory conditions which aspirin is used to treat include Kawasaki disease, pericarditis, and rheumatic fever. Aspirin given shortly after a heart attack decreases the risk of death. Aspirin is also used long-term to help prevent further heart attacks, ischaemic strokes ...

Take pain medication, if necessary. Take NSAIDs, or nonsteroidal anti-inflammatory drugs. NSAIDs come in various forms: ibuprofen (Motrin in particular may be effective), naproxen (Aleve), or aspirin are all commonly-used NSAIDs. If you are under the age of 18, do not take aspirin, as it has been linked to a dangerous disease called Reye's Syndrome, which causes acute brain damage.
