The performance of the Eurozone economy is inextricably linked to the health of its banking system. That means the economy will likely stagnate unless European banks can build robust balance sheets, earn a competitive return on equity, and generate adequate capital to support faster growth and innovation.

As we peer around the corner today on what tomorrow might bring, our work still leads us to forecast lower overall returns. Against this backdrop, however, we see five areas that we believe can help drive both absolute and relative outperformance. First, we believe that we have entered an important period of change in global corporate structures.
