THE MACROPHAGE AS THERAPEUTIC PDF

MACROPHAGE-BASED THERAPEUTIC STRATEGIES IN REGENERATIVE

MACROPHAGE - WIKIPEDIA

the macrophage as therapeutic pdf

Mounting evidence suggests that therapeutic cell and drug delivery strategies designed to actively harness the regenerative potential of the inflammatory response have great potential in regenerative medicine.

Macrophage-based therapeutic strategies in regenerative

A majority of macrophages are stationed at strategic points where microbial invasion or accumulation of foreign particles is likely to occur. These cells together as a group are known as the mononuclear phagocyte system and were previously known as the reticuloendothelial system. Each type of macrophage, determined by its location, has a specific name:

Macrophage - Wikipedia

Macrophage migration inhibitory factor (MIF or MMIF), also known as glycosylation-inhibiting factor (GIF), L-dopachrome isomerase, or phenylpyruvate tautomerase is a protein that in humans is encoded by the MIF gene. MIF is an important regulator of innate immunity. The MIF protein superfamily also includes a second member with functionally related properties, the D-dopachrome tautomerase (D-DT).

Macrophage migration inhibitory factor - Wikipedia

Dear colleagues Welcome to the website for the Asian Association of the EMS. We are an Asia-Pacific community focused on the research of the environmental factors interacting with genomes. Currently, eight Asian EMS societies from China, India, Iran, Japan, Korea, Philippines, Thai and Australia are members of AAEMS.

PSMA-Targeted Theranostic Nanocarrier for Prostate Cancer

Tajpara and colleagues report development of a novel ex vivo herpes simplex virus (HSV)-1 infection model using human skin. This model enabled detection of virus-mediated cellular changes, identification of targeted proteins, and evaluation of a new drug pritelivir, highlighting the utility of this ex vivo platform for studies of host-pathogen interactions and novel therapeutic strategies.
