A male organism is the physiological sex that produces sperm. Each spermatozoon can fuse with a larger female gamete, or ovum, in the process of fertilization. A male cannot reproduce sexually without access to at least one ovum from a female, but some organisms can reproduce both sexually and asexually. Most male mammals, including male humans, have a Y chromosome, which codes for the ...

- One-Female Founders Outperform Their Male Peers. We've been fortunate to back many companies with female founders (and women-founded companies represent a greater percentage of our investments than the national VC average). That's why we were so excited to learn that our investments in companies with at least one female founder were meaningfully outperforming our investments in all-male teams.
