A photonic crystal is a periodic optical nanostructure that affects the motion of photons in much the same way that ionic lattices affect electrons in solids. Photonic crystals occur in nature in the form of structural coloration and animal reflectors, and, in different forms, promise to be useful in a range of applications.. In 1887 the English physicist Lord Rayleigh experimented with ...

On 4 May 1886, a pipe bomb was thrown during a rally at Haymarket Square in Chicago, Illinois, United States. It reached a police line and exploded, killing policeman Mathias J. Degan. The bomb was made from gas-pipe filled with dynamite and capped at both ends with wooden blocks.; In 1985, Palestinian American anti-discrimination activist Alex Odeh was killed in California by a pipe-bomb.

Few thinkers have shown to be as capable as Barry Buzan of continuously impacting the direction of debates in IR theory. From regional security complexes to the English School approach to IR as being about international society, and from hegemony to securitization: Buzan's name will appear on your reading list.

Less effort has been devoted to examining bladder contractility during voiding, although the ICS has defined normal contractility and detrusor underactivity, where the bladder contraction is either of low amplitude and/or of inadequate duration to empty the bladder at the normal rate [ 8]. An index for bladder contractility can be derived from the contractility groups that Schäfer described ...
