I'm looking at a "classic" process maturity assessment done by a consulting firm for a client, and what a useless document it is. I'm not saying who sent it to me or why or where from. That isn't important here because so many assessments are similar. Compare yours. The report analyses 8 practices. It doesn't say why those eight.

In finance, a lattice model is a technique applied to the valuation of derivatives, where a discrete time model is required. For equity options, a typical example would be pricing an American option, where a decision as to option exercise is required at "all" times (any time) before and including maturity. A continuous model, on the other hand, such as Black-Scholes, would only allow for the ...
